Dear Gustaaf,

We are currently blocked from progressing with the work for Ketenbureau as we do not have any Azure subscriptions in the "Vereniging van Nederlandse Gemeenten - I-Sociaaldomein" directory. Without this access, we are unable to perform our tasks effectively.

Please find attached a screenshot highlighting the issue for your reference.

Could you kindly provide us access as soon as possible? This is critical for us to move forward.

Thank you in advance for your prompt attention to this matter.

Thanks,

Josif Todorovski

Hi All,

I provisioned new resources for the deployment, but some of them were not suitable. I tried deleting them and ran a script, but I encountered an error stating that I don't have access to delete the resource group. Upon checking, I found that the error in my script was due to it being set to the wrong scope. However, I'm still unsure how deletion can happen with contributor access on the resource group

Hello,

The default setting for the Contributer-role has the rights to delete (for a reroucegroup also the right to delete the resourcegroup itself, if not explicitely excluded)

Description : Grants full access to manage all resources, but does not allow you to assign roles in Azure RBAC, manage assignments in Azure Blueprints, or share image galleries.

Met vriendelijke groet,

Gustaaf Stevens

Hello,

Thank you for clarifying. Sorry, my bad—I wasn't aware that the default setting for the Contributor role includes the right to delete resources, including the resource group itself, unless explicitly excluded. That makes things much clearer now.

What would be the best way to move forward?

Thanks,

Hi all,

I understand that a resourcegroup is deleted permanently when deleted. So restoring is not an option.

You apparently can only 'try' via Microsoft to restore parts of it, but that will take time and is no guarantee for succes.

So, the best way forward is probably to recreate the resourcegroup
@Gustaaf Stevens: Can you create a new resourcegroup for Devoteam, with a lock to prevent deletion?

@Mert GÜREN: As agreed over the phone, your team wil recreate the solution with existing scripts. Let us know when and where we can put the PST-files.

Warning: We will put a lock to prevent delete for the resourcegroup. This will not prevent the deletion of the resources in the resourcegroup.

Vriendelijke groet,
Viola Smaal

Hello All,

There is a new reourcegroup Chatbot_rg, and the users Josif and Ibrahim have regranted access to this group with the role Contriuter_restricted. The is the default Contributer roll without the right to delete the group itself.

Met vriendelijke groet,

Gustaaf Stevens
